

European School of Interventional Radiology (ESIR) Introduction to Peripheral Vascular Interventions – Hands-On Course November 15-16, 2010, CCVI, Hamburg, DE

The ESIR Institute courses on Peripheral Vascular Interventions aim to provide Interventional Radiologists and CIRSE members the possibility to get tutored hands on training. Programme and speakers are selected by the CIRSE Foundation and we are grateful to our industry partners providing the infrastructure of their institutes including latest simulation technology.

Interventional Radiologists interested to attend this course are requested to apply by registering through the CIRSE website (www.cirse.org). Flight and hotel accommodation to attend the course will be funded by Cordis and CCVI. The course is limited to 14 participants, early application is therefore recommended.

Requirements for Interventional Radiologists from Europe and the Middle East:

CIRSE Members only!

In order to be eligible for the course you need to be a CIRSE member and fulfill the following criteria:

- Work in a department which offers interventional procedures as a treatment to patients and will spend 1/3 to 1/2 of time performing endovascular procedures
- Work in a department starting up an interventional program within the next 3 months after the course program and will spend 1/3 to 1/2 of time performing endovascular procedures
- Experience performing diagnostic angio procedures as a plus
- Have only limited experience with endovascular procedures and/or assisted at procedures

Monday, November 15, 2010

- 12:00 Registration
13:00-14:00 **Imaging, Anatomy, Access and uncommon Pathology** (*T. Cleveland, UK*)
14:00-15:00 **Angioplasty techniques and technology – wires, balloons, stents and others** (*F. Fanelli, IT*)
15:00-15:30 *Coffee Break*
15:30-16:30 **Indications for treatment in lower limb vascular disease – what to use and where** (*V. Berczi, HU*)
16:30-18:00 Simulator Session
- 20:00 Welcome dinner**

Tuesday, November 16, 2010

- 08:30-11:30 **Tutored Hands-on Workshop on Medical Simulators**
11:30-12:30 **Case discussions (tutor cases)**
12:30-13:30 Lunch
13:30-15:30 **Case discussions (delegate cases)**
15:30-16:00 Self Assessment Examination

LECTURE DETAILS

Imaging, Anatomy, Access and uncommon Pathology

T. Cleveland (UK)

- To review the basic lower limb arterial anatomy
- To consider clinically important variants
- To understand anatomical issues as they relate to
 - Treatment options
- Access for endoluminal treatments
- To review the pathological entities affecting the iliofemoral arteries
- Particular emphasis on less common entities
- To review clinically useful pathophysiological measurements
 - Use of velocity measurements
- Use of intra-arterial pressure measurements
- To review the pathophysiology of interventional procedures

Angioplasty techniques and technology – wires, balloons, stents and others

F. Fanelli (IT)

- Which material for which lesion
- Wires selection
- Balloons and Stents overview
- Cryoplasty, cutting-balloon, atherectomy device: when to select special tools
- New Devices: coated balloon, drug-eluting stents, bioabsorbable stents
- CTO devices: how they work

Indications for treatment in lower limb vascular disease – what to use and where

V. Berczi (HU)

- Indications for iliac, femoropopliteal and infrapopliteal lesions
- Indications: symptoms and morphology
- Subintimal or luminal angioplasty
- Acute or chronic lesions
- Medications before, during and after
- Endovascular, surgical or combined procedures
- TASC classification
- Consenting the patients
- Graft surveillance and graft angioplasty

GENERAL INFORMATION

Venue:

Cordis Cardiac & Vascular Institute (CCVI)
Hummelsbütteler Steindamm 71
D-22851 Norderstedt
Germany
Homepage: <http://www.cvi-online.com/>

Registration:

Interventional Radiologists interested to attend this course are requested to apply by registering through the CIRSE website (www.cirse.org) or the attached registration form. All applications must include a short CV and motivation letter.

- All applications will be reviewed.
- Once the application has been accepted flight and hotel accommodation to attend the course will be arranged and funded by CORDIS and CCVI.

CME Accreditation:

ESIR courses are accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists. Each medical specialist should claim only those credits that he/she actually spent in the educational activity. The EACCME is an institution of the European Union of Medical Specialists (UEMS, <http://www.uems.net/>).
