

WHERE THE WORLD OF IR MEETS

Barcelona, Spain  
September 7-11  
**CIRSE 2019**

**SUBMIT YOUR CASE VIDEO TO CIRSE 2019**

Be part of the interventional meeting of the year by submitting a video of an interesting case for one of four video learning sessions at CIRSE 2019! Applications will only be accepted until April 8, so make sure to submit your proposal today! Upon acceptance, you will have until June 15 to submit your video.

**Rolf W. Günther Travel grants for CIRSE 2019**

The Rolf W. Günther Foundation for Radiological Sciences will again be providing travel grants for young European radiologists to attend the CIRSE annual meeting. Starting in April, European residents or fellows can apply for one of 10 travel grants so make sure to have your documents ready!

**IR News spring edition out now**

Browse the latest edition of the CIRSE newsletter to stay up to date on all society news, congresses and initiatives, including a look at CIRSE's new Group Members, a review of the current status of the CIEMAR and CIREL registries, and an overview of the new EBIR format.

**Seven new courses on the CIRSE Academy**

The recently established CIRSE Academy has met great success, allowing many IRs to deepen their knowledge on specific procedures with its concise online courses. After adding seven new topics to its portfolio, the CIRSE Academy now features 21 courses, each worth 1-2 CME credits. CIRSE Members pay less than half of the regular price!

**Become a CVIR reviewer and earn CME credits**

Join the CVIR family and claim up to three CME credits from the UEMS or your national accreditation body for every review you carry out for the journal! To receive a confirmation for your completed reviews, simply contact us at [info@cvironline.org](mailto:info@cvironline.org). Find out more!

**Remembering João Pisco**

The IR community lost one of its pioneers this week with the passing of Professor João Pisco. A tireless physician, researcher, and teacher, Prof. Pisco advocated and innovated for IR both in Portugal and around the world. His ground breaking work on PAE has bettered the lives of countless patients, and he was a constant presence promoting and discussing the technique at CIRSE meetings and events. He will be sorely missed.

**ESIR Course on DEB & cTACE**

Make sure to register by April 15 to catch our reduced early bird fee for the ESIR Course on DEB & cTACE in primary and secondary liver cancer! Taking place in Munich from June 6-7, the two-day course will feature theoretical presentations as well as hands-on training sessions with the opportunity to handle current devices and learn about the most advanced technologies fit for intra-arterial therapy. Don't miss out!

**From sedation to recovery, we help you keep watch over every single patient.**

**Medtronic**
