# CIRSE 2019

LIVE AND ON DEMAND

## CIRSE 2019 NOW AVAILABLE ON DEMAND

More than 7,100 medical professionals flocked to Barcelona to join us for an outstanding CIRSE 2019. The congress' comprehensive programme once again covered all aspects of interventional radiology, including a host of scientific sessions updating attendees on the latest data from all relevant studies and trials. If you did not have the chance to attend the congress or would like to revisit a topic, you can now watch CIRSE 2019 sessions and symposia on demand via the CIRSE Library.

### Submit your abstract for ECIO 2020

Share your work with IO colleagues from around the world by submitting your abstract for the European Conference on Interventional Oncology 2020! Scientific and educational abstracts as well as case reports will be accepted. Click here to find out more and watch a video featuring researchers sharing their experience of presenting at ECIO 2020!

### ET – The future of embolotherapy

We caught up with some of the key physicians whose dedication to embolotherapy made the success of the first European Conference on Embolotherapy possible. We also talked to representatives from some of the conference's most important industry partners to get their take on where the field of embolotherapy is heading. Watch the video to find out more!

### ESIR course on tumour ablation in Innsbruck/AT

Join the two-day ESIR course on reliability in percutaneous tumour ablation from Dec. 12-13 in Innsbruck, Austria for a comprehensive overview of the currently available devices and techniques in the field! The lectures will be followed by hands-on device training sessions, live cases, image fusion training, and plenty of time for discussions with the experts. Sign up by Oct. 18 and save up to 32% in registration fees!

### CIRSE Library topic package on women's and men's health

IRs cover a wide field of pathologies in women's and men's health, applying a great variety of interventional techniques. Knowledge of anatomical structures, indications, risks and possible complications is key to successful treatment in addition to a thorough understanding of all available embolic agents. Browse our latest CIRSE Library package including an expert video on this important topic!

### Winning article of the CVIR Editors' Medal

This year, the prestigious CVIR Editors' Medal was awarded to Martijn R. Meijerink and Robbert S. Puijk et al. for their study on thermal ablation and chemotherapy for the treatment of small unresectable colorectal liver metastases. Read the winning article here!

### Most read CVIR Endovascular papers

CVIR Endovascular's research impact is reflected in the high number of accesses and downloads its articles have received thus far. CVIR Endovascular provides free access to the entirety of its content, resulting in worldwide dissemination of accepted papers. Read the most popular articles here!
