### NEW CIRSE SOP on analgesia and sedation

The newest CIRSE Standards of Practice document published in CVIR provides best practices for the safe administration of procedural sedation and analgesia for interventional radiology procedures in adults. Available free of charge for the next four weeks!

### Award of Excellence and Innovation in IR

Congratulations to this year's winner, Dr. Frederic Deschamps! Dr. Deschamps, of Institute Gustave Roussy in Villejuif, France, will receive the distinction for his scrupulous work on percutaneous fixation by internal cemented-screw in bone cancer patients.

### New topic package on HCC

The CIRSE Library now features a newly released topic package on HCC management. The presentations and guidelines in this package cover the latest info on imaging, treatment, and approaches to HCC. As always, CIRSE members enjoy free access to all content.

### CVIR Endovascular featured article

The rapid IR response to COVID-19 safeguarded the continuation of interventional radiology services. It's once again demonstrating how adaptable and flexible IR can be to changing circumstances. Read more on British IRs' response to the pandemic.

### Free educational content

There is still time to increase your knowledge on a variety of subjects and earn CME credits for free! The CIRSE Academy is currently offering six courses on popular topics at no cost. Access to these courses will only be available until July 24 – don't miss out!
