

ECIO VIRTUAL

INTERVENTIONAL ONCOLOGY 2.0

FIRST INSTALMENT OF ECIO VIRTUAL NOW AVAILABLE ON DEMAND

The ECIO Virtual series - four live webinars and numerous on-demand presentations - kicked off with its first instalment on Nov. 4, bringing together interventional radiologists, oncologists and other healthcare professionals to discuss treatment options for patients with hepatocellular carcinoma.

You can now revisit the various sessions on demand and access additional presentations on other interventional oncology topics. If you have not registered yet, make sure to do so today! It's free for CIRSE members! Each webinar has been accredited with 3 European CME credits.free for CIRSE members!

CIRSE 2020 SUMMIT

CIRSE 2020 Summit highlights

IR vacancies

Find out about interesting job openings in Europe and around the globe via the IR vacancies section on the CIRSE website! If you would like to promote a job opportunity at your hospital or research institution, let us know by filling out this form!

New article type: study protocol

CVIR has added a new submission type to its portfolio – study protocols on prospective or ongoing clinical research can now be submitted. The journal welcomes long-term studies and those with an aim to generate a considerable amount of outcome data. For more information about the article type requirements and writing guidelines, visit the journal website.

Most downloaded articles

Read CVIR Endovascular's most downloaded articles from the past two years free of charge! Articles published in the open access journal do not only generate immediate impact, but also help raise the visibility of endovascular treatments, thus growing the profile of interventional radiology in the endovascular field.

Thank you for participating in the **tumor ablation Peer-to-Peer Experience Review Online Seminar** on November 4th.
