

THE CUTTING EDGE OF MODERN MEDICINE

CIRSE 2020 SUMMIT

SEPTEMBER 12-15
ONLINE

ACCESS THE CIRSE 2020 SUMMIT ON DEMAND

The live event days of the Summit have ended, but CIRSE 2020 is far from being over! All content, including more than 250 invited lectures, 136 free papers, 99 industry lectures and 813 posters can still be accessed online, as can the comprehensive industry exhibition.

If you were not able to join the live congress days, you can now purchase on-demand access which will allow you to view all content exclusively until March 2021.

ECIO VIRTUAL

ECIO Virtual

In order to provide interventional oncologists from around the world with the latest IO data and education until ECIO 2021, CIRSE will host a series of webinars taking place on four days between November and February. Each of the webinars will include a half day of live programming focusing on a specific IO topic and additional on-demand content. CIRSE members will be able to register for free.

CIRSE

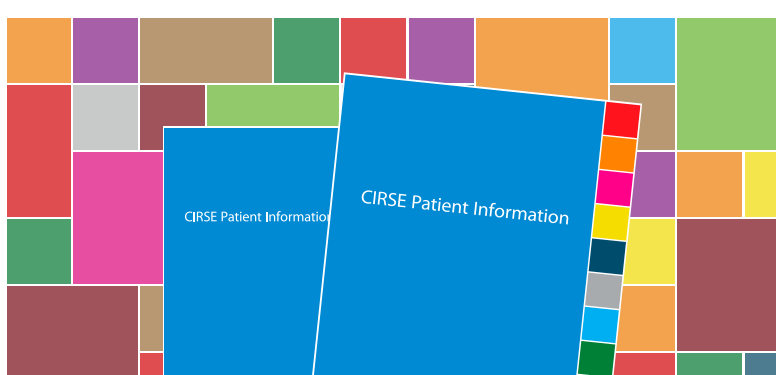

General Assembly 2020 online

Due to the COVID-19 pandemic, the CIRSE General Assembly will take place online this year. All elective CIRSE members are invited to join the GA on November 23, 2020, at 17:00 (CET). An official invitation and the agenda will be sent to all elective members in due course. We look forward to welcoming you to the assembly!

CIRSE observational studies

The results from the CIRSE observational studies on chemo- and radioembolisation have been published exclusively in CVIR! Not only are these the first-ever published results from CIRSE sponsored studies, but they also represent the largest cohorts on their respective treatments. Read about the outcomes of CIRT, CIRT-FR and CIREL here!

Patient information leaflets

CIRSE has created a series of information leaflets letting patients know in plain English what to expect before, during and after several common interventional procedures. Share the digital versions or print them out for your patients!

EuroSafe webinar series

EuroSafe Imaging recently launched its Ask EuroSafe Imaging 2020 Radiation Protection Webinar Series, three of which are dedicated to IR. A recording of the first instalment, entitled "Radiation protection in fluoroscopy guided interventions. Are we doing enough?" can be watched here.

ET 2021

After its very successful launch in 2019, the European Conference on Embolotherapy had to pause for a year due to the COVID-19 pandemic, but will be back in 2021 with a rich programme covering the entire field of embolisation treatments. Make sure to mark your calendar for ET 2021, from June 16-19!

CVIR

CVIR community survey

The CVIR editors work hard to offer the best possible services for your publishing, reading and reviewing experience. By providing them with your feedback, you can help continually advance the journal and its services. It only takes about 5 minutes to complete the survey. Your feedback and suggestions are very much appreciated!

CVIR ENDOVASCULAR

Opportunities for reviewers

CVIR Endovascular is always seeking to enhance the quality of the journal and publish manuscripts of the highest standard. Top-quality peer reviewing is an essential part of this process and could not be achieved without the help of its outstanding reviewers. As we have a growing number of authors and readers, we are looking to expand our team. Join us today!
