# ESIR Courses

European School of Interventional Radiology

CIRSE

The European School of Interventional Radiology is the largest academic and medical association-based clinical procedure course programme for IR in Europe.

Since 2006, more than 100 courses in over 30 different institutions have provided over 3,300 participants with in-depth interactive learning opportunities.

With its first-rate, practice-oriented courses, ESIR provides interventional radiologists and allied healthcare professionals the opportunity to stay abreast with the latest developments in minimally invasive image guided medicine.

ESIR courses' combination of lectures, case discussions and practical components, such as video cases, hands-on activities, simulator and live training and animal labs allow novices and experts to stay ahead of the curve in the application of IR procedures.

ESIR courses are designed to fit into the concept of MedTechs' definition of a Third Party Organised Procedure Training (MedTech Europe Code of Ethical Business Practice).

Corporate partners are invited to financially support the ESIR course programme, provide technology, devices and materials relevant to the given medical topic. Where applicable, they may also directly support healthcare professionals to cover the cost of attendance of the respective ESIR course.

#### **Financial support**

Corporate partners are invited to provide financial support to ESIR courses in accordance with the offered sponsor options and free of the attempt to influence the course programme.

#### **Provision of devices and training technology**

Corporate partners are invited to provide relevant devices and training technology to support the practice-oriented training.

#### **Physician attendance**

Corporate partners may directly support healthcare professionals to cover the cost of attendance of the respective ESIR course.

# HOW TO PARTICIPATE

## Courses, dates and local hosts

Typically, an ESIR course lasts between 1-3 days, has a limited number of participants and consists of clinical procedure and hands-on training which may include training on devices, simulators, in the animal lab and with live and/or recorded cases.

CIRSE is currently in the process of planning the ESIR 2022 and 2023 programme.

CIRSE members are invited to submit topics and apply as a potential host of an ESIR course in their institute.

**Corporate partners are also invited to submit topics and suggest potential host institutes for ESIR courses.**

**All suggestions should be submitted by July 1, 2021, via e-mail to [corporate@cirse.org](mailto:corporate@cirse.org)**

## Scientific and education provider

### **CIRSE Foundation**

CIRSE – Cardiovascular and Interventional Radiological Society of Europe  
Neutorgasse 9, 1010 Vienna, Austria  
Phone: +43 (0) 1 904 2003-26 or -20,  
Fax: +43 (0) 1 904 2003-30
