RSE

ESIR 2022 Clinical Procedure Training

ESIR IN-PERSON COURSES BACK IN 2022!

The European School of Interventional Radiology will be back with its popular two-day courses focusing on a specific condition or procedure with tailor-made sessions, case discussions and handson trainings. Taking place in various locations throughout Europe, the six onsite courses will cover a multitude of topics ranging from radioembolisation of liver tumours to the management of veins and pelvic congestion. Browse the topics and make sure to mark your calendar!

Minimally invasive treatments in malignant thyroid lesions

MITs are increasingly being used in the multidisciplinary treatment of thyroid tumours, including malignancies. In this three-hour webinar organised in cooperation with the European Thyroid Association, a distinguished faculty will present the various currently available MIT techniques, among others with the help of interactive videos.

Calcium: the Achilles heel of femoropopliteal disease?

Be sure to join us on Nov. 11 for a free onehour webinar on the limitations calcium can pose to femoropopliteal disease treatment. An expert panel will discuss real-world cases and share their treatment algorithm approach and the clinical evidence that guides their decision making. Not to be missed!

CIRSE academy

Three new online courses available

The CIRSE Academy has added three new courses to its portfolio and now hosts 44 online courses, 29 of which are CME certified! The new courses focus on vena filters, percutaneous ablation of benign thyroid nodules, and imaging for IR planning respectively. In addition, its course on biliary drainage and stenting has been updated and is now CME accredited. CIRSE members enjoy greatly reduced rates for all courses.

CIRSE library

New topic package: Stroke management

Patient management in pre-hospital settings and in-hospital workflows play a pivotal role in cerebral stroke management. New concepts are still emerging and are being tested in various institutions around the world. Browse this topic package to find out about these logistics systems, imaging selection, the latest evidence and guidelines, and many other important considerations for optimising stroke management!

CIEMAR

CIEMAR goes PMCF

We are excited to announce that CIEMAR patient enrolment has been extended until Jan. 2023. Furthermore, CIEMAR has been approved to submit post-market-clinicalfollow-up (PMCF) data required under the new medical device regulation (MDR). Find out more!

New SOP on TACE

CIRSE has just released its latest standards of practice document providing best practices for performing transarterial chemoembolisation. Available free of charge for the next six weeks, so make sure to share!

CVIR

CVIR Reviewer Workshop

CVIR is offering a workshop for reviewers to build on their reviewing skills, hear from an editor's perspective, gain more insights into Editorial Manager, and help new reviewers navigate the journal's review process. The workshop will take place Dec. 14, 15:00 CET. Make sure to register right away!

CVIR ENDOVASCULAR

Editor's Pick

As radial access is increasingly being used for IR procedures, it is important to be aware of the potential complications and ways to avoid them. This paper gives an excellent overview of the ins and outs of radial access. Enjoy the read!

Literally speaking

Get to know some of the funnier aspects of the many languages spoken by our members in our new segment, where we take a proverb from somewhere in the world and translate it word for word into English.

Can you guess in which language someone might declare **"A mountain shook, a mouse was born"**?

Let us know a funny proverb in your language at communications@cirse.org!

\square	

IR vacancy of the month

Research fellowship in Duarte, California Apply now for this 12-months research fellowship at the Interventional Oncology Bioengineering Lab at City of Hope Cancer Center in Los Angeles to help invent the next generation of locoregional therapies!

Let us know what matters to you!

If you would like to share interesting news about your institution, research project or interventional radiology in general, let us know at <u>communications@cirse.org</u>!

Was the content of this newsletter relevant to you?

□ Absolutely!

 \Box Meh.

 \Box Some of it.

 \Box Sorry, I had nodded off.

Literally speaking – Answer

"Tresla se gora, rodio se miš" is what someone might say to you in Serbia to remind you that something is not as big a deal as people are making it out to be.
