ESIR 2023 Courses

European School of Interventional Radiology

CIRSE

EUROPEAN SCHOOL OF IR

The European School of Interventional Radiology (ESIR) is the largest academic clinical procedure training programme for interventional radiology in Europe. It consists of first-rate practice-oriented hands-on courses hosted by internationally renowned experts and takes place in institutions with specific expertise in the topics presented.

ESIR courses are designed for experienced practitioners who are already familiar with the theoretical aspects and the relevant literature. Under the guidance of an international faculty, participants will learn about the safe and effective use of devices, procedural aspects and clinical care for their patients.

Ample time is given to practical exercises including tips and tricks, hands-on training, live and recorded cases and the exchange amongst participants.

In 2022, six ESIR courses were successfully organised by the CIRSE office, together with the invaluable dedication of expert faculty members, local hosting teams and corporate partners. Extensive workshops, including animal lab trainings, provided participants with unique opportunities to apply theoretic knowledge in practice settings and received very positive feedback from all stakeholders.

In 2023, nine ESIR courses on various topics will be offered to the global IR community. The CIRSE office is eager to ensure top quality IR education and appreciates unwavering support from our industry partners.

COURSE OVERVIEW 2023

Critical Limb Ischaemia

Florence (IT), February 9-10

Local Host: F. Fanelli

Venue: Careggi University Hospital – University of Florence

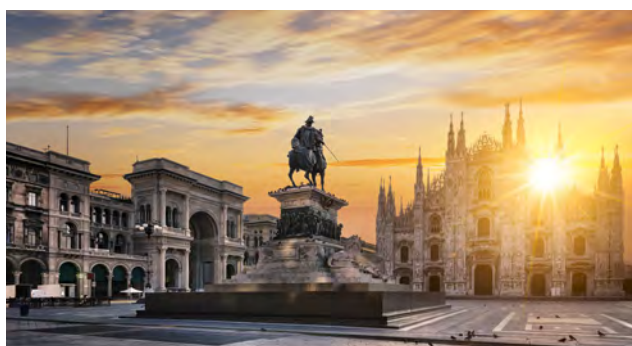

Ablation from A to Z: Liver and Kidney

Strasbourg (FR), February 23-24

Local Host: A. Gangi

Venue: IHU – Institute of Image-Guided Surgery Strasbourg

Prostate Embolisation

Milan (IT), March 23-24

Local Host: A.G. Rampoldi

Venue: AIMS Academy – Ospedale Niguarda Ca'Granda

Non-Liquid Embolisation from A to Z

Strasbourg (FR), May 25-26

Local Host: R. Iezzi, P. Lucatelli

Venue: IHU – Institute of Image-Guided Surgery Strasbourg

Portovenous Interventions of the Liver

Düsseldorf (DE), June 15-16

Local Host: P. Minko

Venue: University Hospital Düsseldorf

Thyroid Thermal Ablation

Milan (IT), October 5-6

Local Host: G. Mauri

Venue: European Institute of Oncology

Ablation from A to Z: Lung and MSK

Strasbourg (FR), October 19-20

Local Host: A. Gangi

Venue: IHU – Institute of Image-Guided Surgery
Strasbourg

Liquid Embolisation from A to Z

Strasbourg (FR), November 16-17

Local Host: C. Binkert

Venue: IHU – Institute of Image-Guided Surgery
Strasbourg

Acute Ischaemic Stroke Intervention

Maribor (SI), December 6-7

Local Host: J. Lučev, S. Breznik

Venue: University Medical Centre Maribor

HOW TO PARTICIPATE

To date, CIRSE has organised 117 ESIR courses with over 3,600 participants. An ESIR course usually lasts around two days and includes in-depth interactive learning opportunities with a combination of lectures, video cases, and hands-on activities (ex-vivo and in-vivo) to allow participants to gain a comprehensive understanding of the respective intervention and refine their procedural and technical skills.

As a corporate partner, you are invited to support and participate in the ESIR courses. The following options are available:

Devices & resources

Corporate partners are invited to provide necessary devices as well as financial means to partly cover the organisational aspects related to the respective ESIR course. All ESIR courses are designed to fit into the scheme of a **“Third Party Organised Procedure Training*”**, in view that each course provides healthcare professionals with information and training on the safe and effective performance of one or more clinical procedures.

Physician attendance

Direct sponsorship of healthcare professionals' registration and travel costs is permissible*. Corporate partners are encouraged to support healthcare professionals' attendance of ESIR courses by inviting them directly or by providing ESIR with educational grants.

If you are interested in supporting ESIR, please contact us at corporate@cirse.org

**Defined in the MedTech Europe Code of Ethical Business Practice*

ESSENTIAL INFORMATION

Content and programme

During the two-day clinical procedure training courses, lectures, hands-on sessions, live or recorded cases, and other workshops may be held. These may include the use of materials and tools provided by corporate partners.

ESIR courses are continuing medical education certified trainings and delegates will be able to claim the respective CME points for attending these courses. The content and programme of these courses are therefore exclusively designed and organised by CIRSE.

Support from corporate partners does not grant any right to influence the didactical principles, the selection of faculty or learning objectives of the respective course.

Demonstrations of devices and materials are carried out by the ESIR course faculty. Upon request, corporate partners shall provide technical support for the respective medical technology.

Prior to the ESIR course

ESIR sponsorship packages may contain a number of free scientific registrations with complimentary access to the course. These may be used by sponsors to invite physicians in accordance with MedTech regulations for third party organised procedure trainings.

In the event that the course is already fully booked at the time of submission of name lists, the maximum number of these free scientific registrations cannot be guaranteed. The number of company representatives per course is limited to two per company.
