

**LAST CHANCE TO SUBMIT YOUR ABSTRACT FOR ECIO 2023**

Don't miss the chance to present your work at the world's largest interdisciplinary congress for interventional oncology, hosting more than 1,400 international experts onsite and many more online! Contributions can be submitted in the categories scientific, educational, case report, and FIRST@ECIO clinical trial, giving you the perfect opportunity to share your clinical experience or latest data with the interventional oncology community.

Abstract submission ends on January 12, so make sure to submit your work today!

**Share your complications case at ICCIR 2023**

The International Conference on Complications in Interventional Radiology (ICCIR) will be back in 2023, offering an intimate setting for interventional radiologists to share their most complicated cases, discuss how they solved them, and learn from each other's experiences. If you have an interesting complications case you would like to share, make sure to submit it by Jan. 26!

**Submit your video case for CIRSE 2023**

If you have a particularly interesting case coming up or if you have already produced footage of a challenging procedure, make sure to submit it for the video case sessions at CIRSE 2023 to share your experience with your colleagues. Apply now and submit your video by Feb. 28 to present your video case live on stage at CIRSE 2023 in Copenhagen!

**Have you submitted your abstract for ET?**

The European Conference on Embolotherapy 2023 is closer than you think and the abstract submission deadline is coming up soon! Abstracts can cover case reports, educational material, new research results, or describe a clinical trial. All accepted abstracts will be published in a special supplement of CVIR and may qualify for the Poster Awards or the Best

**MSK webinar series**

MSK interventions are becoming increasingly important in both palliative and curative settings. CIRSE is therefore hosting a series of webinars from January through May focusing on various aspects of MSK treatment. First up, a panel of distinguished experts from across Europe will take a close look at degenerative MSK disease on Jan. 26. Attendance is free of charge, so make sure to register today!

**Find the course that best suits you!**

Seats are still available for the upcoming ESIR courses on critical limb ischaemia taking place from Feb. 9-10, PAE from March 23-24, non-liquid embolisation (May 25-26), and portovenous interventions of the liver (June 15-16). Later in the year, ESIR will host courses on thyroid thermal ablation, ablation in the lung and MSK, liquid embolisation, and acute ischaemic stroke intervention. Browse all courses and register here!

**EBIR in English, German or Spanish**

If you are from the German-speaking area and would feel more comfortable taking the EBIR exam in your native tongue, you're in luck! There are still spots available for the German-language exam on March 23. Apply by Feb. 16 to secure your spot! The next exam after that will be on Oct. 19 and will be offered in English and Spanish. Why wait any longer? Register today and take your career to the next level!

**CIEMAR reaches 500 patients**

CIEMAR, CIRSE's pan-European prospective single-arm observational study on microwave ablation of colorectal liver metastases, has reached its target of 500 patients after more than three years of patient enrolment! On behalf of the CIEMAR chairpersons and steering committee, we would like to thank all participating centres for their continuous commitment! We look forward to continuing the success of CIEMAR in the coming years with the collection of follow-up data and the publication of interim results.

**Newly updated courses**

Hit the ground running in the new year and update your knowledge on stroke, central venous access, EVAR, and treatment of acute deep vein thrombosis and chronic deep vein obstruction with these four updated CIRSE Academy courses! The courses' authors have been busy making sure all content is up to date, covering all aspects relevant to the respective topic. Don't forget that holders of a 2023 All-Access Pass can enjoy all Academy courses free of charge!

**Scientific writing workshop ahead of PAIRS 2023**

CVIR, CVIR Endovascular, and AJIR, the official journal of the Pan Arab Interventional Radiology Society, will host a writing workshop on Feb. 10-11, ahead of the PAIRS 2023 congress in Dubai, UAE. Looking to improve structure, find out about reporting guidelines, and gain tips on scientific writing in English? Join us to learn all about it and earn 7 CME credits in the process!

**Editor's pick**

Healthcare waste substantially contributes to the global carbon footprint and IRs can play a crucial role in improving healthcare sustainability. This paper by Dr. Shum et al. is a wake-up call and a must-read for all interventionists, as it reviews ways of reducing waste in daily practice and addresses green initiatives to improve IR waste management. Check it out for free and share it with your colleagues!

**Literally speaking**  
Get to know some of the funnier aspects of the many languages spoken by our members in our new segment, where we take a proverb from somewhere in the world and translate it word for word into English.

Can you guess in which language someone might tell you that **you're elbow**, while making the gesture of resting one of their elbows on the palm of the other hand just to drive home the point?

Let us know a funny proverb in your language at [communications@cirse.org](mailto:communications@cirse.org)!

**Let us know what matters to you!**  
If you would like to share interesting news about your institution, research project or interventional radiology in general, let us know at [communications@cirse.org](mailto:communications@cirse.org)!

**Was the content of this newsletter relevant to you?**

Absolutely!  Meh.

Some of it.  Sorry, I had nodded off.

**Literally speaking – Answer**  
“*Ser codo*” is how in Spain you can say that someone is stingy or cheap.
