

BUILDING BETTER CARE

JOIN  
US!

Copenhagen, Denmark  
September 9-13  
**CIRSE 2023**

**HARNESSING THE POWER OF TEAM WORK**

True to its motto “Building better care”, CIRSE 2023 will feature a variety of sessions with a strong multidisciplinary focus. Highlighting the importance of team work for the best possible patient care, IRs and urologists will discuss treatment modalities of renal tumours, benign prostatic hyperplasia, and male sexual dysfunction during the CIRSE meets EAU session. In a similar fashion, the CIRSE meets ESMO session will scrutinize the treatment of HCC and liver meets from the IR’s as well as the medical oncologists’ side. In the expert round tables on new guidelines for HCC management and portal hypertension, IRs and hepatologists will provide their input, followed by what is bound to be an enlightening panel discussion.

Register for CIRSE 2023 today to be ready from the first session onwards, be it onsite in beautiful Copenhagen or joining us with the All-Access Pass via the online congress platform.

**FIRST@CIRSE**

Make sure to join us for this year’s FIRST@CIRSE sessions in which researchers from around the world will present their latest study results. While one session will focus exclusively on vascular trials and studies, the other will include a gamut of topics, from IO to AV access to the treatment of fempop arteriosclerotic lesions.

**Trainees at CIRSE 2023**

CIRSE 2023 will feature various IR trainee sessions and ETF short talks designed by the European Trainee Forum to help residents and trainees get familiar with IR topics particularly relevant to the beginning of their careers. In addition, a networking event will provide an excellent opportunity to connect with young colleagues from around the world.

**Catch up with the industry**

CIRSE 2023 will offer many great opportunities to stay up to date on the latest tools and materials. Enjoy 30 satellite symposia, a comprehensive technical exhibition featuring a Radiation Protection Pavilion, and three dedicated learning centres to find out about everything the industry has to offer!

**ECIO 2023 now in the CIRSE Library**

All ECIO 2023 content is now available via the CIRSE Library, including more than 450 presentations, freely accessible for all CIRSE members and All-Access Pass holders. All satellite symposia from the congress continue to be available free of charge to everyone.

**EBIR exam in Spanish**

Are you a Spanish speaking native wishing to take the EBIR exam, but worried about the language barrier? Then you’re in luck! CIRSE is offering another possibility to take the examination in Spanish in collaboration with SERVEI on October 19, 2023. Why wait any longer? Register today to take your career to the next level!

**Join the growing IASIOS community**

Add your facility to the list of centres accredited with the International Accreditation System for Interventional Oncology Services! If you sign up now, you can take advantage of the annual benefits package and gain full access to workshops, events, and congress registrations. To learn how to put together your facility’s action plan and for a guide to get funding, click here!

**CVIR Editors’ Medal**

As reflected by CVIR’s recently increased impact factor, the journal receives a wealth of high-quality articles. After much deliberation and based on the recommendations from his editors, Editor-in-Chief Prof. Klaus Hausegger has selected this year’s winners of the CVIR Editors’ Medal: Robbert S. Puijk et al. for their 10-year analysis from the Prospective Amsterdam CORE Registry (AmCORE) and Ulf Teichgräber et al. for their 5-year results of the randomized controlled EffPac trial. Congratulations to the winners! The articles are available open access, so feel free to share them with your colleagues!

**CVIR Endovascular survey**

CVIR Endovascular wants to hear from you! Take part in its survey for authors and reviewers to let the editors know what the journal is doing well and where it can improve. You do not need to have reviewed for or submitted to the journal to share your feedback, although those who have experience as authors or reviewers are especially encouraged to participate. Your feedback is much appreciated!

You can complete the short survey by clicking here.

**Remembering Warner Prevoo**

Interventional oncology lost a colleague, friend, advocate, and brilliant pioneer with the passing of Dr. Warner Prevoo.

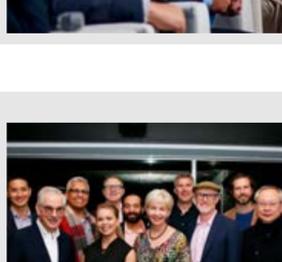

In order to keep you updated on all of CIRSE’s projects and initiatives year-round, the society newsletter has changed its format and will not be available online via the CIRSE Insider. Links to the in-depth interviews and articles will be brought to you every month via the e-newsletter, CIRSE’s social media channels, and of course the CIRSE app!

**Expert opinion on Paclitaxel published in CVIR**

A recently published re-analysis of old data and new outcomes on the link between Paclitaxel coated and eluting devices and mortality concluded that this link was not supported.
