CIRSE 2024

**MAKE SURE TO SHARE YOUR WORK AT CIRSE 2024**

Abstract submission for the CIRSE Annual Congress ends in two weeks, so make sure to submit your work in one of these five categories: Educational, Scientific, Case report, FIRST@ CIRSE Clinical Trial or Trial Design and Methodology. CIRSE junior members who are submitting an abstract as its first or presenting author can apply for free congress registration via the IR Trainee Support Programme. For tips and tricks on what to pay attention to when submitting your abstract, read our two-minute interviews with some of last year's best-scored authors.

ECIO 2024

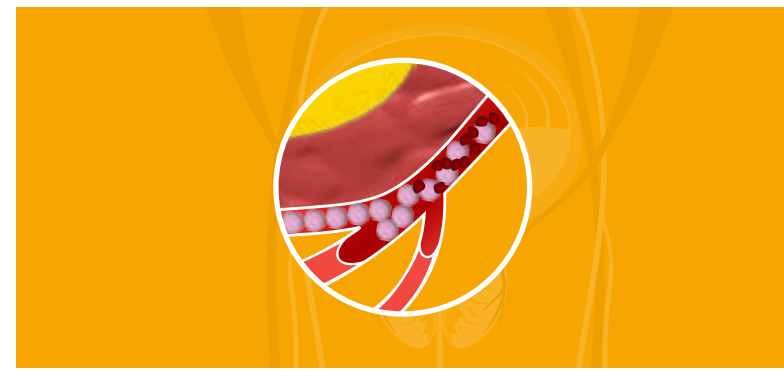

**Take your MDT colleague to ECIO for free**

The Collaborating Against Cancer Initiative still has vacancies for interventionalists registered for ECIO 2024 to take a non-radiologist colleague to the congress for free with travel support of up to €1,000. Spreading knowledge about what interventional oncology can do for the patient among your tumour board has never been easier!

ET2024

**Secure your spot for ET 2024 to save on registration**

ET 2024 is coming up fast, so make sure to secure your registration at the reduced early fee and book one of the specially selected hotels offering preferential rates for ET delegates through our official travel partner Kuoni Tumlare. To put together your personal itinerary, browse the interactive timetable and read the sneak peeks of some of this year's highlight topics!

**Free webinar on PAE**

On April 4, renowned experts will share insights on patient assessment as well as innovative techniques for addressing lower urinary tract symptoms (LUTS), BHP, and PAE in a free 90-minute webinar. Practical approaches will be explored regarding patient management, pre-procedural patient consultation, PAE anatomy, and techniques. Join us for this comprehensive webinar!

**EBIR now available in Italian**

The examination for the European Board of Interventional Radiology is now being offered in Italian in collaboration with SIRM – Interventional Radiology Section. Visit our registration portal and choose Italian as your preferred language to sit the exam on Oct. 24. For more information on eligibility and entry criteria, click here. [Candidati ora!](#)

CVIR

**Publish open access free of charge**

Your paper might qualify to be published in CVIR open access free of charge, making it readily available to anyone wishing to read it. Click here to see if your paper is eligible for free open access publication through one of the numerous Springer agreements allowing authors from participating institutions to publish their work open access in CVIR free of charge.

CVIR  
ENDOVASCULAR

**Blog entry: Interventional radiology nursery**

"Nowadays, we cannot contemplate an IR team without specialised and recognised nurses. Putting the patient at the centre and offering them the best possible alternatives also includes specific attention from nursing, the cornerstone of our work teams," says CVIR Endovascular's social media editor Sara Lojo. Read the entire blog entry here!

ESIR 2024

SPINE INTERVENTIONS:  
ESTABLISHED INDICATIONS

**Spine interventions course**

Join the upcoming ESIR course on spine interventions for established indications taking place at Athens' Attikon University General Hospital. Local host Dimitrios Filippiadis has put together an outstanding programme which will include lectures, hands-on device trainings, controversies sessions, and video case discussions. A must for everyone working in spine interventions! Secure your spot and register today!

IASIOS

**IASIOS welcomes 60<sup>th</sup> hospital**

The International Accreditation System for Interventional Oncology Services has welcomed the 60<sup>th</sup> facility to its global community which now includes 20 countries in the Americas, Europe, Asia, the Middle East, Australia, and Africa. Find out how your institution can join IASIOS and become part of the largest community of professionals working together towards the advancement of interventional oncology!

Next Research

**Lymphangiography survey**

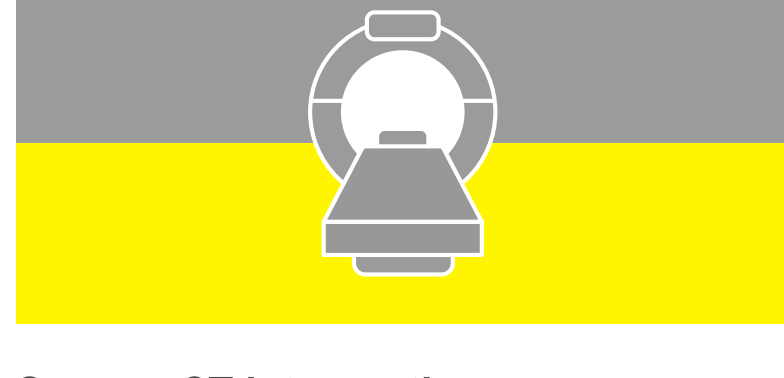

Do you perform lymphangiography and lymphatic interventions, and if so, how do you go about it? To gain an overview of the current practice in this field, CIRSE recently sent out a survey to all its members. If you have not yet filled it out, click here to provide your feedback and support the IR community. Your participation will help advance the understanding of lymphangiography and lymphatic interventions, their effectiveness, and potential areas for improvement.

ESIR 2024

RADIOEMBOLIZATION OF  
LIVER TUMOURS

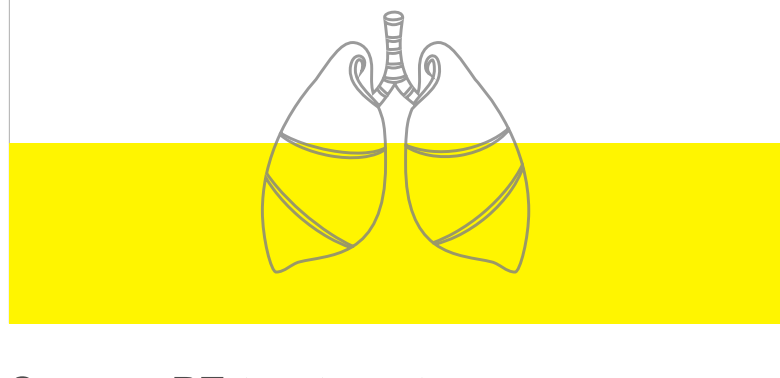

**Course on radioembolization**

In May, ESIR will host a two-day course on radioembolization of liver tumours organized by Maarten Smits and his team at the University Medical Center Utrecht. Led by renowned experts, this course will give both experienced and starting physicians the opportunity to increase their practical skills, become familiar with a range of techniques and products available for radioembolization, and learn more about the latest developments in the field. Register now to catch the early fee!

**Survey: CT interventions**

Image-guidance during interventions is the bread and butter of interventional radiology. Please complete this survey to help us gain a better overview of the current use and challenges associated with CT-guided interventions and other medical imaging modalities.

**Survey: PE treatment**

To assess the status of the provision of IR procedures for the treatment of acute pulmonary emboli in Europe and beyond, CIRSE's Endovascular Subcommittee invites you to fill in this survey. It is completely anonymous and will take no more than five minutes to complete.

MORE OPTIONS.
