NEW CIRSE SOP ON PORTAL VEIN EMBOLIZATION/LIVER VENOUS DEPRIVATION

CIRSE's latest Standards of Practice document provides best practices for performing liver regeneration therapies prior to major hepatectomies, including portal vein embolization, double vein embolization, and liver venous deprivation. Writing group coordinator Prof. T. Bilhim was joined by Dr. G. Böning, Prof. B. Guiu, Dr. J.H. Luz, and Prof. A. Denys in authoring this exemplary document. Many thanks to the group for creating this important resource for the IR community! The paper is open access and can be viewed [here](#). Read it now and spread the news amongst your colleagues!

ESIR 2024

PULMONARY ARTERY INTERVENTIONS

Pulmonary artery interventions course

In this two-day intensive course hosted by Prof. B. Gebauer and Prof. B. Meyer at Berlin's Charité hospital, expert faculty will provide a close look at the treatment of acute and chronic pulmonary embolism, examining pathophysiological basics, diagnosis, and treatment techniques. Participants will have the opportunity to refine their practical skills and explore the latest treatment options through practice-oriented case studies and simulator sessions, guided by renowned experts. Register today to catch the early fee and secure your spot!

New training network for cancer care

Building on the work of the INTERACT-EUROPE project which developed an Inter-Specialty Cancer Training (ISCT) curriculum, INTERACT-EUROPE 100 aims to roll out a new training programme in 100 cancer centres across Europe. It is currently recruiting 100 cancer centres across the continent which will receive multidisciplinary training for their cancer care professionals. CIRSE strongly encourages centres offering interventional oncology services to apply to become a training centre! Click [here](#) to find out more.

CIRSE academy

New courses available

The CIRS Academy has added two new courses to its portfolio. The first one focuses on radiological involvement in percutaneous renal stone management, covering numerous aspects from stone biochemistry to imaging to access techniques, and more. In its second new course, the Academy delves into image-guided intra-articular injections, and how to safely conduct these increasingly used procedures.

IASIOS

First hospital achieves centre of excellence status

The University Hospital of Strasbourg has become the first facility to receive centre of excellence status from the International Accreditation System for Interventional Oncology Services, recognizing the hospital's exceptional commitment to the highest standards of patient care and service in interventional oncology. To start your hospital's accreditation journey, visit www.iasios.org!

CVIR

New impact factor

We are thrilled to announce that CVIR now holds the highest impact factor in the field of interventional radiology at 2.8! This success is a testament to the journal's steady progress and commitment to excellence over the years. Thank you to our dedicated contributors and readers for making this possible!

CVIR ENDOVASCULAR

Impact factor received for 2023

Exciting news! After receiving its first impact factor for 2022 last year, CVIR Endovascular's impact factor for 2023 remained stable at 1.2. A big thank you to all editors, reviewers, authors, and readers for their time and dedication to further the development of endovascular treatments!

Im memoriam Prof. Dimitrios Tsetis

The Greek and international medical community lost one of its greats on June 22 with the too-soon passing of Prof. Dimitrios Tsetis at the age of 62. A dear colleague and friend to so many, he dedicated his life to interventional radiology for the benefit of countless patients.

CVIR Endovascular Young Investigator Award: An interview with Prof. Clements

CVIR Endovascular will offer a Young Investigator Award again this year to support young IRs in their research. With the July 31 deadline for applications coming up fast, we spoke to Prof. Warren Clements, who won the award in 2023, for his thoughts on what he feels stood out about his work, the challenges that young researchers face, and his words of encouragement for this year's applicants.

INTERACT-EUROPE 100: Words of encouragement from Dr. Orsi

A new EU project, the INTERACT-EUROPE 100 initiative is recruiting 100 cancer centres across Europe to take part in an interdisciplinary training programme over the next three years. Dr. Franco Orsi, who represents CIRSE in the INTERACT-EUROPE 100 consortium, wrote to us to tell us about the background of the programme and why it is imperative that centres with interventional oncology practice take part.
