LEADERS IN ONCOLOGIC INTERVENTIONS

## ECIO 2025 IS ALMOST HERE

The world's most comprehensive interdisciplinary conference on interventional oncology is only a week away! If you are not able to join us in Rotterdam, make sure you are fully registered to stream the lectures and symposia and browse all posters via the congress platform! For a preview on some of this year's programme highlights, check out these sneak peek articles from the lecturers! For more tips on how to get ready for ECIO 2025, click here!

ET2025

ICCIR 2025

## Catch the early fee

Covering the practical aspects of embolotherapy as well as a thorough examination of the current evidence in the field, ET 2025 is the conference to be at for every practitioner offering embolization treatments. The early fees are still available, so secure your spot today and save up to 40% on registration! In addition, you can save on accommodation in beautiful Porto by using CIRSE's official hotel map and booking tool.

## Complications conference

The International Conference on Complications in Interventional Radiology, which only takes place every other year with a strictly limited number of attendees, will provide a valuable opportunity for practitioners to discuss complications management with experts from around the globe in an intimate and supportive setting. An opportunity not to be missed! Browse the programme and secure your spot today!

## Put yourself forward

If you or your team have developed a new IR technique, created cutting-edge technology, or published new research which have made a significant contribution to the field, submit your application for the Award of Excellence and Innovation in IR! The winner of this prestigious distinction which comes with a cash prize of €6,000 will be awarded at the CIRSE 2025 opening ceremony.

## New patient information leaflets

CIRSE's Patient Information Task Force has released new leaflets designed to inform patients in plain language about what they can expect to experience during several common IR procedures. There are now 19 leaflets available for individual download or printing as a complete set. All material is freely available, so feel free to add it to your clinic or hospital website!

CVIR

CardioVascular and  
Interventional Radiology

CVIR

ENDOASCULAR

## CVIR scientific writing programme

The second instalment of CVIR's scientific writing programme "Basic statistics and meta-analyses" will take place online on May 21, 16:30-18:00 CEST. Providing essential insights into statistical methods and meta-analysis techniques, it will enhance participants' research and manuscript writing skills. Don't miss this opportunity and register now! You do not have to have participated in the first instalment of the course to register for the second part.

## Quarterly update: Venous thrombosis

The latest edition of CVIR Endovascular's quarterly updates delves into venous thrombosis, exploring recent advancements in thrombectomy devices, venous stenting, and procedural innovations. Stay up to date with eight cutting-edge studies shaping the future of venous thrombosis treatment and test your knowledge with our quiz based on this issue's featured articles.

CVIR

ONCOLOGY

ESIR 2025

## Onsite activities at ECIO 2025

CVIR and CVIR Oncology will be hosting a variety of activities at ECIO 2025. Visit the journal booth to meet some of our editors as well as the editorial team, learn more about the journals, and take part in the journal quiz for a chance to win free registration for CIRSE 2025! To celebrate the launch of CVIR Oncology, the editorial office will host a special reception on Sunday, April 13 at 14:00 in Foyer 2.2. Come celebrate with us over food and drinks!

## PAE course in Milan

The European School of Interventional Radiology will host a two-day course on prostate artery embolization in Milan. Taking place from June 26-27, it will feature lectures from renowned experts, followed by a video cases discussion, training on simulators, and the opportunity to test many of the currently available devices. Register by May 1 to take advantage of the reduced early fee!

IASIOS

## IASIOS events at ECIO 2025

At ECIO 2025, IASIOS will offer a workshop about the importance of radiographers and nurses within the IR team. Of particular note for centres interested in accreditation: a workshop on how to strengthen clinical pathways and drive excellence in IO. The ever-popular IASIOS cocktail reception will offer the opportunity to connect with peers from around the world. This year, attendees can also win prizes in a fun scavenger hunt. Not to be missed!

CIRSE academy

## New and updated online courses

The CIRSE Academy has updated its educational offering, including its courses on image-guided drainage of fluid collections, treatment of isolated iliac artery aneurysms, management of the failing haemodialysis access (AV fistula or graft), and postpartum haemorrhage. In addition, the Academy now features a course on the treatment of prostate cancer. Browse all courses here!

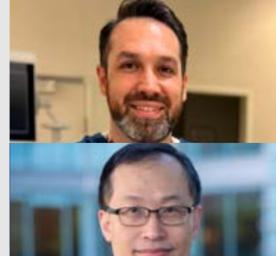

CIRSEinsider

For all interested parties wishing to learn more about CIRSE's projects and initiatives, CIRSE Insider provides in-depth articles and interviews on everything going on within the society. Click on the links below to find out more!

## New group member: ISIR

Further solidifying a long-standing relationship, the Irish Society of Interventional Radiology (ISIR) has become a CIRSE group member this year. ISIR President Dr. David Tuite spoke to us on the history of his society, Irish IRs' collaborations with CIRSE, and the strides that ISIR is making in Ireland to secure the future of interventional radiology.
