

European Conference on Interventional Oncology

ECIO 2026

APRIL 26 - 30 | BASEL, CH

ABSTRACT SUBMISSION NOW OPEN!

Submit your work for ECIO 2026

ECIO's interdisciplinary spirit makes it a one-of-a-kind forum for collaboration and knowledge exchange across the MDT, highlighting the vital role of interventional oncology in cancer care.

Abstract submission for ECIO 2026 has already begun. Don't miss this opportunity to present your work on the world's biggest stage for minimally invasive cancer care – submit your abstract today!

ESIR 2025

CIRSE

ALL-ACCESS PASS

Close the year with procedure training

Last minute spots are still available for the upcoming courses of the European School of Interventional Radiology. Taking place at Strasbourg's IHU, the Nov 27-28 course will focus on the intricacies of liquid embolization and feature both ex vivo and in vivo workshops – a unique training opportunity! In another course taking place from Dec. 16-17, all aspects of acute ischaemic stroke will be scrutinized. Register today to secure your spot!

2026 All-Access Pass now available

The 2026 All-Access Pass is now available, so you can already secure access to CIRSE's entire educational portfolio today, giving you an additional 1 ½ months at the same price! Access the CIRSE Library's 13,000+ titles and more than 70 CIRSE Academy courses year-round and enjoy strongly reduced onsite registration fees for CIRSE's 2026 congresses, all with one ticket!

CIRSE

academy

Fellowship grants available soon

The application period for the 2026 CIRSE fellowship grants will start Nov. 24! The CIRSE Fellowship Grant Programme allows CIRSE members in good standing to apply for a €3,000 grant to fund a one-month stay at a European centre outside their country of residence, where they can train or experience new procedures. Browse our list of recommended training institutes and start putting together your documents to be ready!

More course updates

The CIRSE Academy continuously updates its courses to keep them on the cutting edge of technical and clinical development. Most recently, the courses on percutaneous ablation of benign thyroid nodules and pelvicalyceal and ureteric obstructions have received an update to reflect the latest developments. If you do not have access to the CIRSE Academy yet, get your 2026 All-Access Pass today and start enjoying all benefits right away!

ESIR course bridges learning with ethical research

The European School of Interventional Radiology's course on MSK embolization which took place from Oct. 16-17 was among the first MSK embolization courses to incorporate an in vivo animal lab training component. Peter Minko and Arian Taheri-Amin coordinated the use of the animal material already generated during the training for further scientific analysis.

Be smart with your dose: Radiation Protection Pavilion highlights from CIRSE 2025

Since 2014, the Radiation Protection Pavilion (RPP) has stood out as one of the most engaging spaces on the CIRSE 2025 exhibition floor, serving as a central hub for education, innovation, and awareness on radiation safety in interventional radiology. This year was no exception, with a wide array of presentations touching on key issues.
