LEADERS IN ONCOLOGIC INTERVENTIONS

ECIO 2026 is around the corner!

Only a few more days until the world's largest community of interventional oncology experts will convene in Basel for the IO congress of the year!

Educational grants to attend ECIO 2026 free of charge have now been made available through the support of Sirtex. **Apply here** to secure one of the strictly limited grants.

IR trainees and practitioners breaking into interventional oncology are encouraged to join the **IO Foundation Course** taking place on the first day of ECIO 2026. In addition to getting to know the IO toolkit, you will learn about the main elements of oncology care provided by the various MDT members, including the essentials of surgical, medical, and radiation oncology, as well as relevant aspects of histopathology.

For 2026 All-Access Pass holders who cannot make it to ECIO in person this year, all sessions will be made available for on-demand streaming via the congress platform. Don't have an All-Access Pass yet? Get yours today!

Watch IROS 2026 on demand

This year's edition of IROS, the annual congress of the German, Austrian, and Swiss IR societies, is now available for on-demand streaming via the CIRSE Library. All lectures can be viewed with English subtitles.

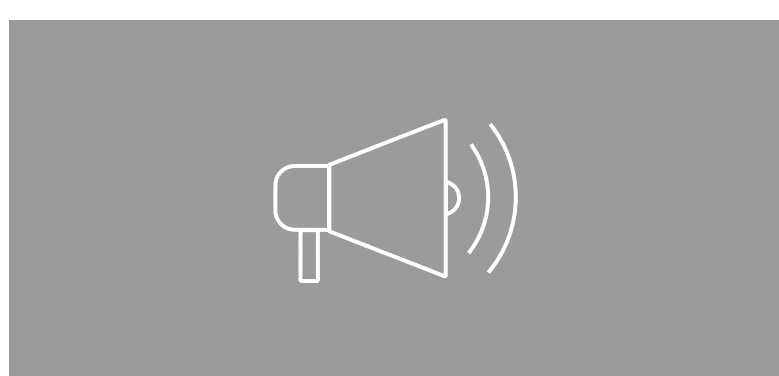

Last chance to secure the early fee

Make sure to register for ET 2026 by April 23 to secure the strongly reduced early fee and save up to 40%! Featuring more than 100 lectures from international experts, ET 2026 is the embolization conference you cannot afford to miss!

Catch the opening fee

CIRSE 2026 is coming up fast, so register today and catch the strongly reduced opening fee saving you up to 60%! To book your accommodation, use our interactive hotel map including special deals with up to 50% discounts. To catch a sneak peek at this year's programme, read these articles from some of our distinguished lecturers!

Call for participants: AI in IR

IR trainees, consultants, and researchers are invited to take part in a qualitative study exploring perspectives on the current and future applications of AI in IR. Participants are asked to participate in a 45-60 minute semi-structured interview conducted online (Microsoft Teams). No preparation required. If interested, please contact Dr. Soni at l.soni@imperial.ac.uk

SOP spotlight on interventional oncology

With ECIO 2026 around the corner, CVIR is making it easy to get a refresher on relevant standards of practice with this selection of SOP documents. Keep your procedural fingers on the pulse and take a look here.

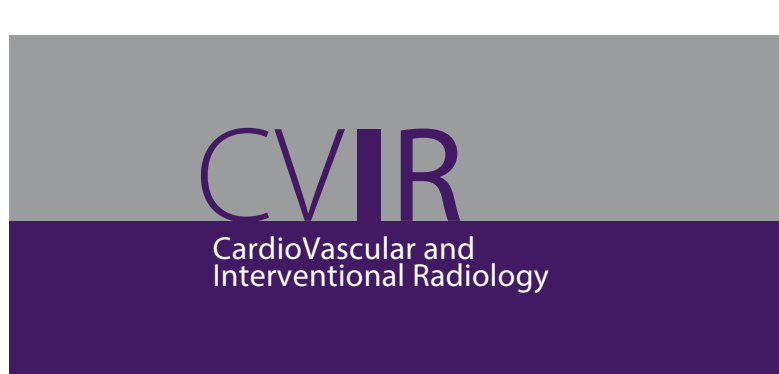

Author Spotlight

In the latest episode of CVIR Endovascular's Author Spotlight series, Dr. Sara Lojo dives into her paper, "IR beyond the procedure: mastering patient and team management" Read the article here and watch the video to learn more about her perspective!

CIRSE journals at ECIO 2026

CVIR and CVIR Oncology will host a variety of activities at ECIO 2026. Visit the CIRSE Journal Family booth to meet editors, ask your burning questions, and learn more about the journals! Click here to find out more!

Editor's Choice

An AR-microscopy tool based on a small-model CNN trained on ~1.2K images and tested on 50 blinded cases achieved high accuracy and 96% concordance. This could expand access without on-site pathology. Read this article to find out more!

IASIOS at ECIO 2026

Join the IASIOS Accreditation Workshop with Dr. Jean Palussière and Prof. Dimitrios Filippiadis to learn more about IASIOS' accreditation process and how your centre can take this next step to further improve patient care. Register here to secure your spot!

ESIR at ECIO 2026

Celebrating its 20-year anniversary, ESIR has some special activities lined up for ECIO 2026, including a paediatrics workshop and a TACE championship. Stop by the ESIR booth in the exhibition to find out more and register!

For all interested parties wishing to learn more about CIRSE's projects and initiatives, CIRSE Insider provides in-depth articles and interviews on everything going on within the society. Click on the links below to find out more!

Q&A with the BRIGHT study chairpersons

In 2025, CIRSE announced BRIGHT (Bleeding Reduction in Grade II-III Haemorrhoids through Embolisation Treatment), a prospective, multicentre observational study managed by next researchers. CIRSE Insider spoke with the study's chief investigators, Drs. Clare Bent, Christoph Binkert, Roberto Iezzi, and Vincent Vidal, to learn more.
