

CIRSE JOURNALS: NEW IMPACT FACTOR!

CIRSE Journals’ impact factors continue to rise

The CIRSE Journal Family continues to broaden its reach. CVIR, the society’s flagship journal, managed to increase its impact factor to 3.4 over the past year, keeping its ranking (Q2) in the category ”Radiology, Nuclear Medicine & Medical Imaging” and further solidifying its status as the premier IR journal. Likewise, the impact factor of CVIR Endovascular also increased and is now 2.1. Congratulations to the journals’ authors, reviewers, and editors for this success and a big thank you for making the CIRSE Journals the cornerstone of interventional radiology research.

CIRSE 2026

Last chance to catch the early fee

he interventional radiology congress of the year is fast approaching! Make sure to register today to catch the strongly reduced early fee and save up to 40%. To book your accommodation, we recommend using CIRSE’s official travel partner Kuoni Tumlare. With its convenient hotel map, it’s never been easier and safer to get the best deal on your stay at the congress.

Sustainability travel grant

54 travel grants (each worth up to €500) for young European radiologists/IRs registered for CIRSE 2026 are up for grabs! All medical residents, fellows, and recently graduated physicians in diagnostic and interventional radiology within their first five years of practice, both from Europe and overseas, qualify. What are you waiting for? Submit your application today!

Share your MDT experience

The CIRSE member survey on IR presence in multidisciplinary team meetings is still collecting responses. It will only take five minutes to share your experience and greatly help in evaluating the status of IR involvement in MDTs!

Take over the CIRSE social media channels

Want to share your clinical work with an audience of more than 20,000 followers? Apply today for a takeover of the CIRSE social media channels and share a week in your life with the world’s largest IR community. To find out more and apply, e-mail communications@cirse.org.

Publish open access free of charge

Find out if your paper qualifies for free open access publication in CVIR! Click here to see if your paper is eligible for free open access publication through one of the numerous Springer agreements allowing authors from participating institutions to publish their work open access in CVIR free of charge, and share your research with a global audience.

Young Investigator Award

Take the next step in your research career by applying for the CVIR Endovascular Young Investigator Award which recognizes outstanding early-career contributions to the journal. The winner will be honoured at the joint CIRSE Journals Awards Ceremony and Reception at CIRSE 2026. Apply by July 14 to throw your hat in the ring!

Beyond technical success: oncological accountability in liver tumour ablation

Discover this concise companion to the recent Lancet Oncology international consensus papers on liver tumour thermal ablation standards and ablation margin assessment. Designed as an accessible gateway to the broader consensus work, it highlights key recommendations aimed at making liver ablation more reproducible, measurable, and accountable to oncological outcomes.

Assess your readiness for IASIOS accreditation

Wondering how close your interventional oncology service is to achieving accreditation of the International Accreditation System for Interventional Oncology Services (IASIOS)? Use this self-assessment tool to receive a personalized report, tailored recommendations, and an indication of your current level of readiness.

SOP spotlight on embolization

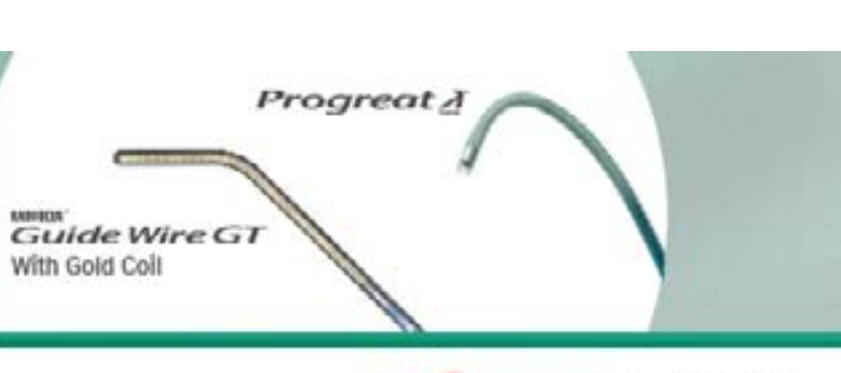

To celebrate the success of ET 2026, we have curated a selection of corresponding documents to let you refresh your knowledge on a range of embolization procedures. Written by expert IRs in your community, CIRSE’s SOPs bring the gold standard for patient care to print. Spruce up your skills and get reading now!

ESIR course on PAE

There are still some last-minute spots available for the upcoming two-day intensive course on prostate artery embolization taking place in Harlow, GB, from July 2-3. Register today to take part in this excellent learning opportunity featuring simulator training and video cases.

The Quality You Trust in MSK Embolisation
