CIRSE 2026

Beyond the lecture – taking learning to the next level

CIRSE 2026 will feature an all-new format: Beyond the lecture. These interactive, audience-driven sessions will let attendees set their own learning objectives by asking the questions they’ve always wanted to discuss with experts from around the globe. After a short introduction to the respective topic by the faculty, the floor will be open for discussion. Take part in this exciting new format on percutaneous ablation, visceral aneurysms, biliary disease, lymphatic intervention, and arterial intervention to determine where the journey will go – ask your questions, add your input, and enjoy the debate! If you already have a question, you can send it in here.

Women in IR workshops

Gain personal and professional growth in the Women in IR workshops taking place during CIRSE 2026! Following the format’s great success at previous congresses, this year’s edition will feature a new, highly immersive format, designed to strengthen confidence, communication, and leadership in clinical practice. Places are limited, so make sure to secure your spot today!

Submit your IVUS case

Medical residents, fellows, and recently graduated physicians are invited to submit their successful IVUS cases to this year’s Philips IVUS Case Competition. The top five candidates will receive free registration for CIRSE 2026 and travel support of up to €2,000 to present their case at the congress. Learn more here and submit your case today!

STANDARDS OF PRACTICE

Addressing complications in IR: SOP flashback

In 2025, CIRSE members Dr.s Dimitrios Filippiadis, Philippe Pereira, Klaus Hausegger, Anthony Ryan, and Christoph Binkert came together to create the modified CIRSE Classification System for Complications in IR after the need to update the previous system had been identified at ICCIR 2023. The revised system has clear and measurable parameters and is easily adopted into clinical practice. If you haven’t yet had a chance to read this important update, access it here.

CVIR
ONCOLOGY

Stay up to date with the latest oncology research

Discover the latest articles in CVIR Oncology, showcasing innovative research, recent developments, and expert insights in the field. Read, get inspired, and share with your professional network. All articles are open access and freely available to all interested parties.

CVIR
ENDOVASCULAR

Fake or Fact IR

Fake or fact? “Choosing embolization instead of surgery for varicocele means accepting inferior fertility outcomes.” Click here to check out the latest #FakeOrFactIR quiz question from CVIR Endovascular Social Media Editor Dr. Sara Lojo Lendoiro to find out the answer.

CIRSE academy

Free course: Clinical practice in IR

The CIRSE Academy is the premier learning tool to stay up to date on the latest technical and clinical developments in IR from the comfort of your own home. Get to know the CIRSE Academy with the clinical practice in IR course – free of charge until August 31! If you enjoy the experience, unlock the full Academy with the 2026 All-Access Pass and gain access to the complete course catalogue, CME-accredited learning, and many more benefits.

IASIOS

Five-Year Anniversary Offer

Take advantage of our limited time offer and receive two years of annual membership in the International Accreditation System for Interventional Oncology Services (IASIOS) at no additional cost. The offer is available until the end of October 2026 and is limited to a select number of centres on a first-come, first-served basis. Click here to learn more or simply contact us at office@iasios.org.

CIRSEinsider

For all interested parties wishing to learn more about CIRSE’s projects and initiatives, CIRSE Insider provides in-depth articles and interviews on everything going on within the society. Click on the links below to find out more!

Artificial Intelligence at CIRSE 2026: a Q&A with Dr. Sara Lojo Lendoiro

At CIRSE 2026, delegates will have the opportunity to explore SPHAIRE, a dedicated area featuring an exhibition, presentations, and interactive discussions on the latest developments in artificial intelligence, and deepen their understanding of what AI can offer interventional radiology. CIRSE Insider spoke with SPHAIRE Coordinator Dr. Sara Lojo Lendoiro about what delegates can look forward to in this year’s programme.

Semmelweis University’s Onco-Interventional Department achieves first IASIOS Accreditation in Central and Eastern Europe

Semmelweis University’s Onco-Interventional Department has become the first centre in Hungary and in Central and Eastern Europe to receive accreditation from the International Accreditation System for Interventional Oncology Services (IASIOS). The recognition reflects years of clinical work in image-guided, minimally invasive cancer care and marks a significant step forward for the specialty’s development across the region.
