Submit your abstract on pain management for ECIP 2027

Interventional radiology plays an increasingly important role in pain management with practitioners offering a variety of minimally invasive solutions. CIRSE has therefore created the European Conference on Image-Guided Pain Management (ECIP), a unique platform for interventionists from around the world to discuss treatment methods, current data, and where the field is headed.

After its successful launch in March 2026, ECIP 2027 will take place in beautiful Estoril, Portugal, and IRs are invited to submit their abstracts on the treatment of cancer pain, innovations, neuropathic pain, paediatric, pelvic pain, peripheral skeleton, spine, and other pain treatments. Learn more here and make sure to submit your abstract by November 19!

Best Scientific Paper Award

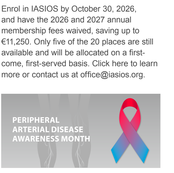
Many congratulations to the winner of the CIRSE 2025 Best Scientific Paper Award, Mr. Christian Römer, who was chosen by the Scientific Programme Committee and the audience attending the scientific paper sessions for his paper AI-derived fully automated 3D body composition predicts outcome after transjugular intrahepatic portosystemic shunt placement.

Clinical training courses this fall

There is still time to secure your spot for one of the clinical training courses ESIR is offering this fall, including on embolization with liquids and particles, prostate biopsy and focal therapy, EVT of acute ischaemic stroke, and reliability in percutaneous tumour ablation. Register now to catch the reduced early fee!

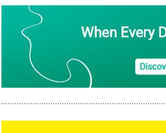
Reflections on the past 35 years of IR

Read this insightful editorial by Prof. Klaus A. Hausegger, one of the CIRSE 2026 Gold Medallists, as he reflects on the past 35 years of progress in interventional radiology, since the first CIRSE meeting he attended in 1991. Drawing on decades of experience, he revisits the specialty's remarkable evolution and shares his thoughts on the opportunities and challenges ahead.



Reading club

In CVIR Endovascular's latest reading club LinkedIn post, Sara Lojo discusses the article Liquid embolic agents: a practical overview by A. Cannavale et al., raising the following question: As liquid embolic agents continue to expand across peripheral interventions, is it time to move from experience-based agent selection toward evidence-based algorithms supported by comparative clinical trials, or will embolic choice always remain fundamentally dependent on individual operator expertise and procedural context? Join the conversation in the comments!

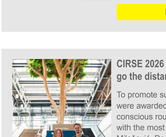


Explore the latest in oncology research

Stay informed with the newest articles from CVIR Oncology, featuring innovative research, emerging developments, and expert perspectives from across the field. Explore the latest findings and share them with your professional network.

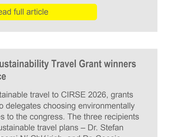
Five-year anniversary offer: only five places remaining

Enrol in IASIOS by October 30, 2026, and have the 2026 and 2027 annual membership fees waived, saving up to €11,250. Only five of the 20 places are still available and will be allocated on a first-come, first-served basis. Click here to learn more or contact us at office@iasios.org.



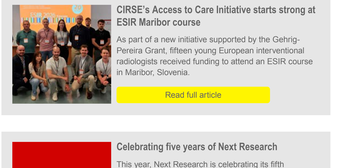
EBIR practice questions – Clinical case scenarios

The CIRSE Academy is now offering a module featuring a series of practice questions designed to help candidates prepare for the clinical case scenario section of the EBIR examination. Prepare with realistic cases based on previously used EBIR exam questions and get familiar with the format, question styles, and clinical reasoning of the clinical case section. Now available via the All-Access Pass!



Spread the word about PAD

September is PAD awareness month! To support greater awareness and understanding of PAD and available IR treatments, the CIRSE Library is offering free access to ten lectures on the topic throughout September. Make sure to share the link with your referring physicians to help raise awareness of PAD and the role of interventional radiology in its treatment!



CIRSE insider

For all interested parties wishing to learn more about CIRSE's projects and initiatives, CIRSE Insider provides in-depth articles and interviews on everything going on within the society. Click on the links below to find out more!

In conversation with the CIRSE 2026 Magna Cum Laude Poster Award winners

Out of hundreds of submissions, the CIRSE 2026 Scientific Programme committee selected two winning posters: Dr. Luigi Manuzzelli et al.'s "Oral branched-chain amino acids supplementation in patients with cirrhosis and refractory ascites undergoing TIPS: an interim analysis of a randomized controlled trial" and Dr. Sachin Pathare et al.'s "When the artery whispers before it bleeds: the angiographic nipple sign as an early indicator of visceral arterial instability". Find out what the authors had to say about their research!

CIRSE 2026 Sustainability Travel Grant winners go the distance

To promote sustainable travel to CIRSE 2026, grants were awarded to delegates choosing environmentally conscious routes to the congress. The three recipients with the most sustainable travel plans – Dr. Stefan Milošević, Dr. Naomi Ní Chléirigh, and Dr. Coosje Verhagen – were selected by the CIRSE European Trainee Forum jury to receive additional funding. The winners, who travelled by bus, rail, ferry, and even bike, were invited to share their journeys with CIRSE Insider.
